result in the same work.__ Show your answers and explain. This conclusion is supported by the calculations below. In each case, the angle Θ in the work equation is 0°; this is the angle between the ... Read from Lesson 1 of the Work, Energy and Power chapter at The Physics Classroom: KE PE . . . A . C: = Internal Forces External Forces). the ...

Work - AP PHYSICS 1
Answer: E. When a car skids to a stop, the work done by friction upon the car is equal to the change in kinetic energy of the car. Work is directly proportional to the displacement of the car (skidding distance) and the kinetic energy is directly related to the square of the speed (KE=0.5*m*v 2).For this reason, the skidding distance is directly proportional to the square of the speed.

Wilke / AP Physics 2 - Parkway Schools
Answer: D The vector sum of 6.0 meters and 8.0 meters will be the greatest if they are added together in the same direction; that would produce a resultant of 14 meters. The vector sum of 6.0 meters and 8.0 meters will be the smallest if they are added together in the opposite direction; that would produce a resultant of 2.0 meters.

Vectors and Projectiles Review - with Answers #2

Vectors and Projectiles Name: 10. 11. the diagram below to construct a free-body diagram for a vertically launched projectile as it rises ards its peak, at its peak, and as it is falls from its peak.

KM 754e-20151123083302
Answer: C Fgrav = G•m1 2 d2 a. gravity b. the acceleration of gravity c. the gravitational constant 8. TRUE or FALSE: The value of G (in the equation above) is an enormously large number; that explains why (at least in part) the force of gravitational attraction between the Sun and the very distant Earth is such a large number. Answer: FALSE.
