Depth perception is the visual ability to perceive the world in three dimensions and the distance of an object. Depth sensation is the corresponding term for animals, since although it is known that animals can sense the distance of an object (because of their ability to move accurately, or to respond consistently, according to that distance), it is not known whether they "perceive" it in the ...

Depth perception - Wikipedia

From the appendix to The Power of Habit: The difficult thing about studying the science of habits is that most people, when they hear about this field of research, want to know the secret formula for quickly changing any habit. If scientists have discovered how these patterns work, then it stands to reason that they...Read More

How Habits Work - Charles Duhigg

Clinical interventions based on training in mindfulness skills are an increasingly common part of psychological practice. Mindfulness training can lead to reductions in a variety of problematic conditions including pain, stress, anxiety, depressive relapse, psychosis, and disordered eating but to date there have been few attempts to investigate the effectiveness of this approach with ...

Mindfulness and the treatment of anger problems ...

"Describing science as actions, by saying 'let's do science,' leads to more science engagement than does describing science in terms of identities, by asking them to 'be scientists'" explains ...
