WEBLINK | Year 12 BIOLOGY - Biozone

Analysing a Gene Pool By determining the frequency of allele types (e.g. A and a) and genotypes (e.g. AA, Aa, and aa) it is possible to determine the state of the gene pool. The state of the gene pool will indicate if it is stable or undergoing change for some reason - an important indicator that evolutionary events may be taking place.

OHT 06 Population Genetics - MACscience

Answer Key – LO 1.2. ... If one trait is favored by the environment, then it will alter the gene pool as this will impact the potential for reproduction and thus the frequency of the alleles which shall lead to drift in future generations. The equilibrium may also be hampered by the occurrence of gene flow within the population.
