Peppered Moth Simulation - jacob royle 8th grade science

Natural Selection in Peppered Moth Populations suggested that the light forms were removed from the population by birds because they were so conspicuous. Additional support for this idea came from non-industrial regions (and areas upwind from polluters) where the mottled form greatly outnumbered the melanic moths.

NATURAL SELECTION IN PEPPERED MOTH POPULATIONS

Play the part of a predatory bird hunting for moths in the forest. A wonderful activity that shows how different camouflage leads to selective predation and so to a change in the population. Depending on whether you choose to hunt in a pre-industrial or post-industrial forest you will find either the dark moth or the light moth easier to catch.
