OUT OF EDEN. He carried out and published clinical research in the areas of nutrition, infectious disease (including malaria), and genetics, focussing on the interactions between nutrition, genetics and infection, in particular iron nutrition, thalassaemia and malaria. He returned to England in 1997, writing the book Eden in the East:...

Having been in the biological sciences for my whole career, I can relate to the turf battles he describes and the positions different research groups have taken and feel they need to defend. I look forward to future reading on the topic but I feel as though "Out of Eden" did a great job of bringing me up-to-speed.

The Human Journey: Migration Routes. When humans first ventured out of Africa some 60,000 years ago, they left genetic footprints still visible today. By mapping the appearance and frequency of genetic markers in modern peoples, we create a picture of when and where ancient humans moved around the world.
