Physical Properties & Chemical Properties?!? | Yahoo Answers

Physical properties can be observed or measured without changing the composition of matter. Physical properties are used to observe and describe matter. Physical properties include: appearance, texture, color, odor, melting point, boiling point, density, solubility, polarity, and many others.

what is physical property? | Yahoo Answers

Best Answer: PROPERTIES physical properties are something that can be measured or observed without changing its composition or identity. color, texture, boiling point, melting point, hardness, etc. chemical properties are ability to react with other chemicals (ability to corrode, burn, etc.) CHANGES ...

what are chemical and physical properties? | Yahoo Answers

Best Answer: I wish chemistry teachers would stop trying to throw this into the first few weeks of chemistry. In many cases the differences between a chemical change and a physical change are so blurry as to be nonexistent. Students simply don't have the experience and knowledge to know how to deal with this.

Physical or Chemical Properties? | Yahoo Answers

When you look at oranges, you know that they are oranges because of their color, shape, and smell. Mass, color, shape, volume, and density are some physical properties.
