Physio 90 Exercises And Answers

A supraspinatus tear is a tear or rupture of the tendon of the supraspinatus muscle. The supraspinatus is part of the rotator cuff of the shoulder. Most of the time it is accompanied with another rotator cuff muscle tear. This can occur in due to a trauma or repeated micro-trauma and present as a partial or full thickness tear.[1] Most of the time the tear occurs in the tendon or as an ...

Introduction Back in August, we saw how a rehab program consisting of eccentric heel drops with a bent and straight knee reversed damage to the Achilles tendon by inducing collagen remodeling. One thing I didn't make clear enough is that Alfredson's eccentric heel drop protocol, developed in 1998, was designed for midpoint Achilles tendonitis. In most cases of Achilles injury, the tendon is ...

Learn just why older people fall, & a 4-step plan to personalize fall prevention for an aging person. Includes practical tips on what to ask the doctors.

Fall Prevention: Why Older Adults Fall & What to Do

Spinal stenosis is an abnormal narrowing of the spinal canal or neural foramen that results in pressure on the spinal cord or nerve roots. Symptoms may include pain, numbness, or weakness in the arms or legs. Symptoms are typically gradual in onset and improve with bending forwards. Severe symptoms may include loss of bladder control, loss of bowel control, or sexual dysfunction.

Spinal stenosis - Wikipedia

Tenotomy is performed in order to lengthen a muscle that has developed improperly, or become shortened and is resistant to stretch. Club foot is a common developmental deformity in which the foot is turned inward, with shortening of one or more of the muscles controlling the foot and possibly some bone deformity as well.
