No answers for this online that are free, can anyone do this question? Specifically the first part so that I check if I'm right? Thanks. 14. This problem concerns the mathematical treatment of a simple model of an electric toy car of mass m , which is initially stationary. The batteries in the car can be considered as an electrical power source with constant power P .

Physics aptitude test help? | Yahoo Answers

I would think A-level physics is at least at that level. I did get an O-level in physics - it was probably already enough training to get me through this test, but I was especially interested in the subject and also had a very good physics master. That said, I wouldn't take the test completely for granted.

If I ace the Physics Aptitude Test for Oxford, am I guaranteed (or very likely to get) a place? - Quora

Have each volunteer take the test. Ask volunteers to write their names and occupations at the top of the page. Score each test based on the difference between the volunteer's answer and the correct answer. For instance, if the answer is 197 and the volunteer writes 160 (or 234), the score for that question would be 37.
