Unit Four: Genetics - 7th Grade Science - Google Sites

Best Answer: Assuming that you are starting with a strain of fruit flies that are true-breeding (are homozygous for the trait, meaning that both of their chromosomes have this mutation) then ALL of the males will have this trait. Why? Because they only have one X chromosome, which comes from their mother, and if she's true breeding, she only has one kind of X chromosome to give her sons, which ...
