Weathering is related to erosion as well, but we are going to do a whole section of erosion later on. Erosion is the process of moving and depositing weathered material. As part of this unit we are going to be doing a daily YouTube video series called The Daily Dose of Destruction which shows weathering and erosion caught on tape.

Weathering | Earth Science

During the Ice Ages, glaciers covered as much as 30% of Earth. Around 600 to 800 million years ago, geologists think that almost all of the Earth was covered in snow and ice. Scientists use the evidence of erosion and deposition left by glaciers to do a kind of detective work to figure out where the ice once was. Formation and Movement of Glaciers
