Best Answer: We can't control the snails in our tanks as we don't have the ability to do a complete cleanse of the entire aquarium system. The little tiny snails I guarantee you are seeing are in many of our tanks and plants, as they reproduce incredibly quickly and if you miss even one egg, these asexual little buggers will be back.

why are there snails on my aquarium plants? | Yahoo Answers

Best Answer: If you want them live plants to keep living, get rid of them snails! I've had an experience with them recently, and they're rather annoying. Those snails are actually rather large. To remove them DO NOT buy any chemical. This can cause your tank to become instable. To remove them: a) pick them ...
