Chapter 17 Section 3: Population Genetics and Speciation

1. ____ is the study of evolution from a genetic point of view. ANS: Population genetics DIF: 1 OBJ: 16-1.1 2. A ____ shows that most members of a population have similar values for a given measurable trait. ANS: bell curve DIF: 1 OBJ: 16-1.2 3. ____ results from flawed copies of individual genes.

CHAPTER 16—POPULATION GENETICS AND SPECIATION

The Population Genetics of Speciation: The Evolution of Hybrid Incompatibilities. Department of Biology, University of Rochester, Rochester, New York 14627.

The Population Genetics of Speciation: The Evolution of ...

Population Genetics. Population Genetics is the study of evolution from a genetic point of view (it is the study of microevolution) Microevolution —a change in the collective genetic material of a population. Population -members of the same species that can interbreed. It is the smallest unit in which evolution occurs.

Chapter 16

Population genetics is a subfield of genetics that deals with genetic differences within and between populations, and is a part of evolutionary biology. Studies in this branch of biology examine such phenomena as adaptation, speciation, and population structure.. Population genetics was a vital ingredient in the emergence of the modern evolutionary synthesis.
