Predict what happens to an element when it undergoes alpha decay. Explain the concept of half life, including the random nature of it. Begin to gain an understanding of the forces that work to hold an atomic nucleus together (strong nuclear force) and the forces that work to break it apart (Coulomb, i.e. electric charge, force).

The PhET Fission simulation does an excellent job of showing the process of fission, what is produced from fission and how a chain reaction occurs. By modeling fission, students gain a clear picture of the difference between fission and nuclear decay that was learned in the previous 2 lessons.
