Archer G11 Partner: Alisa 1 March 2012 Preparation and Properties of Buffer Solutions Purpose: The purpose of this experiment is to compare the pH effect on buffered and non-buffered solutions as well as making a buffer of a certain pH. This can be done by observing the change in pH of the buffered solution and non-buffered solutions.

Buffer solutions are composed of a weak acid (the proton donor) and its conjugate base (the proton acceptor). Buffering results from two reversible reaction equilibria in a solution wherein the concentration of proton donor and its conjugate proton acceptor are equal.

A guide for the preparation and use of buffers in ...

The investigation begins with an introductory activity to compare the properties of three acetate buffers containing varying ratios of HA and A⁻. The results provide a model for designing an experiment to prepare a desired buffer and verify its properties and performance.
