Abstract. A mathematical function is a rule that gives value of a dependent variable that corresponds to specified values of one or more independent variables. A function can be represented in several ways, such as by a table, a formula, or a graph. Except for isolated points, the mathematical functions found in physical chemistry are single-valued.

### Physical Chemistry (3rd ed.) by Robert G. Mortimer (ebook)

Physical chemistry if done correctly, will win over students and make them into specialists not often found in other majors. Remember, this is probably the most difficult title in chemistry, and you need a good text to guide you along. You are not going to get much help with Mortimer's attempt. If you are at this level, please don't pretend you ...
