How High Definition Works. High definition video on IP cameras is often referred to as either 720p or 1080p. 1080p, or full HD resolution, records images that measure 1920 x 1080 pixels; 720p HD images measure 1280 x 720 pixels. The "p" in 720p and 1080p stands for "progressive scan," which helps minimize blur caused by movement. Older-style...

Weatherproof 1080p High Definition Night Vision Dome IP ...

High Resolution Cameras . High resolution cameras capture images at a higher horizontal Television Line Number (TVL) than 420TVL. Having a higher TVL results in a clearer picture because an increased TVL adds more detail to the image. For example, a camera that is rated at either 420 TVL or 320 TVL is considered to be Standard Definition.
