Read the background in order to answer the Pre-Lab Questions that follow) The genus Paramecium

includes several species of one-celled protists that live in freshwater. When there is enough food, water, and space, populations of these species grow rapidly and follow a pattern known as exponential growth, in which the total number of potentially ...

Virtual Lab: Population Biology - Community Unit School ...

Evolutionary Trade-offs. While there are many factors that can affect allele proportions in a population, selection is thought to be among the most powerful. Selection effectively shapes the heritable physiology, morphology, and behaviors of populations through differential reproduction among individuals.

Selection - Virtual Biology Lab

Virtual Lab: Population Biology. How does competition affect population growth? Paramecium aurelia Paramecium caudatum. ... Answer questions #1 and #2 BEFORE you run the experiment. Click the top of the purple dropper on the left (P. caudatum) and drag to test tube 1.

Virtual Lab: Population Biology - Livingston Public Schools

The exponential growth model describes how a population changes if its growth is unlimited. This model can be applied to populations that are small and/or have no competition for resources. The logistic growth model describes how a population changes if there is an upper limit to its growth.

Population Dynamics | HHMI BioInteractive

Then they compare growth curves of the population of each species, alone and then together. Objectives: Demonstrate how competition for natural resources in the environment can affect population growth. Explain how availability of resources such as food can be limiting for a population.

Virtual Lab Population Biology - CPALMS.org

Virtual Lab: Population Biology Shannan Muskopf June 5, 2016 This lab uses the glenco simulator, Virtual Lab: Population Biology to collect data on two populations of paramecium, P. caudatum and P. aurelia .
