A computer network is a digital telecommunications network which allows nodes to share resources. In computer networks, computing devices exchange data with each other using connections between nodes. These data links are established over cable media such as wires or optic cables, or wireless media such as Wi-Fi.. Network computer devices that originate, route and terminate the data are called ...

in which  $V_i f(\cdot)$  is the terminal cost. Several methods for taking into account the interaction between subsystems in non-cooperative control have been proposed. For example, Farina and Scattolini (2011) propose that each controller chooses a reference trajectory that it transmits to the other controllers with a guarantee that its actual state trajectory will lie within a known ...
