Chapter 16 Evolution of Populations 16-1 Genes and Variation Darwin's original ideas can now be under-stood in genetic terms. Beginning with variation, we now know that traits are con-trolled by genes and that many genes have at least two forms, or alleles. We also know that individuals of all species are heterozy-gous for many genes.

### **Chapter 16 Evolution of Populations Summary**

A population is a group of individuals of a species in a particular area. Population ecology studies things like population growth, selection strategies, population distribution, demographics and how populations evolve and adapt. Chapter 9 Concept Map - will not be able to view on iPad. DAY 1. Chapter 9 Lecture Guide
