Possible solutions for air pollution - answers.com

Air pollution can be defined as an alteration of air quality that can be characterized by measurements of chemical, biological or physical pollutants in the air. Therefore, air pollution means the undesirable presence of impurities or the abnormal rise in the proportion of some constituents of the atmosphere. It can be classified in 2 sections: visible and invisible air pollution.

Solutions to air pollution: how to improve air quality?

Water is an indispensable resource. It also has the potential to transport pollution throughout broad areas during the course of its natural, continuous cycle. Water is constantly rising through the air and being blown around to different areas. That same water also falls and flows across surfaces, picking up chemicals and other pollutants.
