This is an example of a shape that had shapes cut out of it. In order to do the problem successfully, I had to fill out the table with the correct values for each variable In the end this gave me enough values to calculate for the final centroid for the given questions.

2.1 Statics - 2012-2013POE Austin S - Google Sites

Activity 2.1.1 Centroids Introduction Finding the centroid of a shape like a circle or square is very easy. However for an object such as a beam, the centroid is only represented by the geometric center if the material is uniform or homogenous. Beams and other materials are often reinforced with a different material. Such reinforcement likely changes the location of the centroid from the ...
