object.

**What pigment is used to make enamel paint? - Quora**

Best Answer: It depends, like just about anything! You have to educate yourself. Art supplies vary so greatly and can go from being pretty safe, quite literally like dirt, to being extremely toxic, especially if inhaled like Cadmiums. Be careful!!! I'm not vegan, so I'm not an expert on this, but I can say ...

**Are powder pigments non-toxic? | Yahoo Answers**

1. A primary pigment or paint is a chemical dye which is imparted to an object and is capable of absorbing a single primary color of light. The three primary pigments are cyan (C), magenta (M) and yellow (Y). By mixing these colors an artist can create any color by only having three different colors of paint.

**Lesson 2 Light Waves and Color The Physics Classroom: http ...**

A hobby type paint will often replace expensive pigments with cheaper ones, normally denoted by the word hue, sometimes they will bulk out the paint with fillers, these can be all sorts of additives. Generally artists paints claim not to do this. Some claim just to use pigment and oil, this is rarely true.

**What are the best type of brushes to use with acrylic paint?**

Pigments -Mixing Paint & Printing – Color by subtraction of light Pigments simply absorb certain frequencies and reflect others. Whichever color the pigment reflects the most will be the color that the pigment appears. For example blue pigment reflects mostly blue, but also reflects violet and green while absorbing all other colors.
