Ethan got 80% of the questions correct on a test, and there were 55 questions. How many did he get right? The number of questions correct is indicated by: Ethan got 44 questions correct.

Calculate percentages with Step-by-Step Math Problem Solver

Mary sliced a pizza into 10 equal pieces and ate two. John ate 15% of a pizza of the same size. Who ate more?

Percents, Percentage - Problems with Solutions - Math

After having gone through the stuff given above, we hope that the students would have understood "Solving percent problems worksheet". Apart from the stuff given above, if you want to know more about "Solving percent problems worksheet", please click here Apart from "Solving percent problems worksheet", if you need any other stuff in math, please use our google custom search here.

SOLVING PERCENT PROBLEMS WORKSHEET - onlinemath4all

And if we know what x is, we know the total amount of saline is going to be 10% of x . If we had 50 here, it would be 10% of 50. If we had 10 here, it would be 10% of 10. So the amount of saline we have in this solution, in x ounces of this solution, is going to be $0.1x$, or 10% percent of x . That's what 10% of the solution being saline means.
