The multiverse is a theory in which our universe is not the only one, but states that many universes exist parallel to each other. These distinct universes within the multiverse theory are called parallel universes. A variety of different theories lend themselves to a multiverse viewpoint. Not all physicists really believe that these universes exist.

### **Parallel Universes - Fred Alan Wolf - Google Books**

The multiverse, also known as an omniverse or meta-universe, is a hypothetical group of multiple universes. Together, these universes comprise everything that exists: the entirety of space, time, matter, energy, and the physical laws and constants that describe them. The different universes within the multiverse are called "parallel universes", "other universes", or "alternate universes".

### **Multiverse - Wikipedia**

Please post a hypothetical parallel universe and see the results of how it would differ from this universe. I'm a one person moderation team, so please do help in any way you can. Report posts that don't seem to fit, all that. Thank you.
