### **14.1 EARTH THE WATER PLANET Flashcards | Quizlet**

The ocean is the major reservoir for water on Earth. A reservoir is a storage area, usually for water. Evaporation, condensation, and precipitation connect oceans with all other bodies of water on Earth. Ocean water has more salt in some places than in others. Rivers bring fresh water to parts of the ocean.

### **Water on Earth - Pearson SuccessNet**

Water makes up nearly three quarters of the Earth's surface, but it does more than just cover our planet. It also plays a vital role in shaping it. Consider the Grand Canyon.

### **Water on the Earth - Miami-Dade County Public Schools**

Earth's land provides soil and forests, as well as mineral and energy resources. • Removing and using resources from Earth's crust can damage the environment. 4.4 Protecting Resources Starting in the 1970s, the federal government passed several laws to prevent or decrease pollution and protect resources.

### **Chapter 4 Earth's Resources - Plain Local Schools**

Sample answer: We can use less water in our daily lives. For example, we can turn off the faucet when we brush our teeth. Sample answer: Different types of water pollution affect humans and ecosystems in different ways. For example, biological pollution can make people sick. Sample answer: Water pollution harms humans and ecosystems.
