(c) Answers may vary. Sample answer: If the average wind speed on the farm is not very high, the farmer could build a taller tower. This would provide more wind power, but would increase construction costs because more building materials would be needed. 44. Given: power = 100 W = 100 J/s; energy emitted = 1.6 J/s Required: efficiency Analysis:

### **Unit 3 Review, pages 364-371 - Durham District School Board**

Answers may vary. Sample answer: An object that has a lot of inertia has a much stronger resistance to changes in motion. If it is at rest, then it will require more force to start moving it. If it is in motion, then it will require more force to change that motion. Similarly, an object with less inertia has less resistance to changes in motion ...

Sample answer: The average speed is based on the distance travelled. Changes in direction do not affect the average speed. The average velocity is based on the

**Section 1.4: Velocity and Acceleration in Two Dimensions**

Answers may vary. Sample answer: What you said about the constant speed of the object isn't right. Even though the speed is still the same, the direction has changed from north to south. That means that the velocity has changed, so there must have been an acceleration in the direction of the change. 6. (a) In the first segment, the object accelerates
