Certain medications can cause increased bilirubin levels in some people. Some drugs decrease the uptake of bilirubin by the liver, which can lead to higher blood levels. Examples of drugs that have this effect include the antibiotic rifampin (Mycobutin) and probenecid, which is used to treat gout.

What causes my bilirubin levels to be slightly elevated? - Quora

I'm talking to someone who is 18, and I'm 15. I'll be 16 before he's 19, so it's like a two and a half year difference. I know deep in my heart he doesn't seek sex from me, and our feelings are much more than that. He has already went out of his way to show that to me. My mom has already met him, and she loved him. I just now told her that he is 18, and went on to tell her that he told me ...
