When comparing the momentum of two moving objects, which of the following is correct? a.

Assessment Chapter Test A - Miss Cochi's Mathematics

This is College Physics Answers with Shaun Dychko. The acceleration due to gravity on the surface of this newly discovered planet is going to be the universal gravitational constant, capital G, multiplied by the mass of the planet divided by the radius of the planet squared. We're told that the mass of the planet is two times the mass of the Earth, so we make that substitution for M_P , $2 M_E$...
