Plant Reproduction Answer Key - eduplace.com

Plants are the key to life on Earth. Without them many other living organisms would soon disappear. This is because higher life forms depend on plants, either directly or indirectly, for their food. Most plants, however, are able to make their own food using sunlight. All plants fall into two basic categories. Flowering plants produce true flowers.

PLANT REPRODUCTION - XTEC

Plants are autotrophs that never need to eat because they can make their own food; they are called producers. A green chemical in plant leaves, called chlorophyll, uses energy from sunlight and chemicals from the air and water to make sugar. There are more than 300,000 kinds of plants on Earth.
