these (90) problems cover a range of topics and have been made available by the AQA exam board in England powerpoint solutions the questions are mainly unaltered but I have slightly altered the wording in places, changed some of the numbers and added some suggestions for extending some of the questions

MEDIAN Don Steward mathematics teaching
A quadrilateral, sometimes also known as a tetragon or quadrangle (Johnson 1929, p. 61) is a four-sided polygon. If not explicitly stated, all four polygon vertices are generally taken to lie in a plane. (If the points do not lie in a plane, the quadrilateral is called a skew quadrilateral.) There are three topological types of quadrilaterals (Wenninger 1983, p. 50): convex quadrilaterals ...
